- Data Structures
- Html, CSS and Java script
- Node.js

Seeking an internship or entry-level position in software field, where I can apply my skills and knowledge to contribute to meaningful projects while gaining valuable experience and further developing my expertise.

PROJECTS

TOUR PLANNY

Travel Destination Website

I worked on a tourism website project, contributing to both the front-end and back-end development. On the front-end, I helped design user-friendly and visually appealing interfaces to enhance the browsing experience. On the back-end, I contributed to building a robust and scalable system that ensures smooth functionality and optimal performance. My role involved close collaboration with the team to deliver an engaging and efficient website.
